

Pupil Premium Funding: Tibberton 2015-16

Schools receive extra funding from the government to support the education of the most deprived children.

We are required to publish how we spend this money.

In 2014 -2015 we received £3,900.00

This year we are projected to receive £7,720.00

We are using the funding in a number of ways to support "Looked After Children" and children on Free School Meals or who have been on Free School Meals in the past.

Extra hours have been given to Teaching Assistants to support the vulnerable learners such as socially disadvantaged children. This may be individual support or within the classroom or playground. This has allowed us to have higher than expected adult: pupil ratios in class as we believe guidance and feedback from adults raises the standards for the most vulnerable children. The support may be around curriculum subjects to aid attainment and progress or it may be linked to personal development to promote a child's mental health and well- being.

- These children can have subsidised places at Breakfast Club and on site After School Clubs. It also enables these children to gain wider experiences & participate in social situation they would otherwise be excluded from.
- Parents of these children can ask for support with educational visits, the school residential, the cost of school swimming lessons, music tuition and school uniform expenses.

We believe that enabling vulnerable children to be included in whole school life & providing extra support with key skills impacts upon their achievement and their personal & social skills.

IMPACT

Due to our small cohorts and extremely small numbers of children in receipt of Free School Meals it is impossible to show trends in terms of attainment. All data should be looked at with caution as other factors may apply to these children rather than just their receipt of a Free School Meal.

End of Early Years Data 2015

Overall our results were well above national expectation for all pupils including Pupil premium.

End of KS1-Reading, Writing & Maths Data 2015

On average our children were significantly above National Expectation in all three core subjects. Extra teaching assistant led interventions ensured the best possible progress for all children including Pupil Premium.

The impact of Pupil Premium Funding is monitored by the Senior Leadership Team and the Governors.
